Assignments

Web development project

ACADEMIC YEAR 2019

Semester 2

Lecturers

Chaminda Wijesinghe

What is Online canteen

The project online canteen system helps the users to book their food earlier. The users have to book their food on the e-menu card. As soon as they book their food the order will be sent to the chef for preparing it. The present system consists of the manual system that involves the paper work of the billing system and maintaining the files too. In the proposed system the payment is online and the e-menu will be available for the user. The users will have the username and the password through which they can book. This project will help in demonstrating the route from adapting materials to developing an online environment. This brings all necessities in one place that benefits both the user and the canteen owner smartly.

Advantages

- Customer can check the food items details with prices efficiently
- Saves a lot of time of customers because of online transactions
- Customer can keep track of their orders too.

Group member-

- Kanchna dilrukshi –(body head ,index)
- Resmitha pranawithana(payment methord)
- Naduntha(NEWS LATER)
- Pavithra de silva(LOGING SYSTEMS)
- Kavindu yasintha silva(ADMIN)

Use languages

- Php
- Html/css
- Java stripts
- Jquery
- bosstrap
